Technical rider “Fashion Diabolo”:

- The show is 6 minutes long

Stage:

- Minimal size: 3m*3m*3m (the stage is smaller? No problem. Contact me in advance, and we will find a solution)
- Optimal size: 5m*5m*5m

Light need:

- Basic light
- If possible, lights from front, sides and back
- If possible white and pink light

Music need:

- Basic sound system with CD or MP3 entry

Light plan:

- I go to the center of the stage during the black. Then I wait for the music and light before I start
- The light starts
- Fade in of pink (duration of the fade in 40 seconds) once I take the second Diabolos from the breast of the model. At this time starts the second song as well. It happens at about 2:40.
- When I juggle the 3 Diabolos in the air, and give a clear sign with my leg you can do a black for 5 seconds. (My Diabolos have LED lamps). Then put the same light than before the black.

Music plan:

- The act is energetic. The music can be loud.
- Start the music about 1 second after the light went on. (I m on center stage waiting for the music and light before I start). **No fade in.**
- When I take the diabolo out of the breast of my plastic model put the second song on. There is no need for a fade out/fade in. It happens at about 2:40.
- Do not confound with the taking the diabolo of the back of the model which happens at 0:25
- I end on the music.

Light and music rehearsal:

I need 20 minutes. More time is better. If there is less time, no problem. But inform me in advance.
